

## James Klim

DDS, FAGD, FADFE, PC

### Aesthetic, rehabilitative and general dentistry

Dr. Klim uses neuromuscular technology to recapture facial length and relieve head and neck pain. This approach marries the artistic and functional aspects of dentistry to the smile makeover and consequent "face lift," predictably lengthening the lower face and diminishing facial lines between the cheek bones and chin. Facial muscle tension decreases, promoting a residual lifting effect on the surrounding tissues and muscles of the eyes.

The net result is that clients may experience many of the benefits of a facelift without surgery and experience relief from TMJ symptoms that can disrupt a person's quality of life.

#### ABOUT JAMES KLIM

- **Recognized for authentic smile designs**

National Best of Show and First Place awards in cosmetic dentistry; listed in "Guide to America's Top Dentists" 2003-2004 edition; Feature story on neuromuscular dentistry on KTVU Channel 2 with Bob MacKenzie's Segment 2.

- **Advanced cosmetic dentistry instructor** at the Las Vegas Institute for Advanced Dental Training; Nation-wide speaker for dentists and staff on clinical dentistry and practice management.

- **Known for academic excellence**

Summa Cum Laude Valedictorian (Loma Linda University School of Dentistry); **Academic Awards & Honors:** Basic Science Award, Dean's Award, Omicron Kappa Upsilon Society, and Alpha Omega Fraternity academic distinction; **Post-graduate achievements:** Fellowship with the Academy of General Dentistry and the Academy of Dental Facial Esthetics, Accreditation with the American Academy of Cosmetic Dentistry.

- **A great sense of fulfillment** comes from the life-changing results and success stories of his clients who come to his practice for various cosmetic and TMJ pain solutions. Each has an inspiring story.

“My smile is not the only transformation I experienced from Dr. Klim's aesthetic care. Since adjusting the posture of my lower jaw and bite, my chronic headaches are gone.

Now that's an even greater reason to smile.
